Phenomenology of Mind

By G.W.F. Hegel (signed Jean Hyppolite for French students and for Louis Althusser especially)

I. Sense-perception (this)

II. Logic of Sense (Hyppolite)

III. Event of Revelation (French language, Hyppolite note)

Note – by Jean Hyppolite

Just be about the revealed process of a sense-image. Now this is simple just the image on a tain of the mirror or some reflection of glass. Here we undersand simplicity – pure Being.

Add jokes – I say.

Psychoanalytic rigour – Alain Badiou

Perhaps some psychoanalytic jokes or stories then.

On why – Louis Althusser

It must be because, this way we abstract in life. We are just abstract, but Marx argues be scientific as well. The pure person is just a scientist – we are philosophers of the mind – and about distress in psychoanalysis. It will just win by Communism of course the doctors attend to you truly.

Now we can be philosophers – just covering the simple nature of the infinite. For instance is the infinite a process of reading books – and reflecting on the window?

I mean it will develop a logic of – mathematics as well – Poincare conjecture that type of stuff.

Science of Logic

By G.W.F Hegel

I. Pure Being

Being is simple, just pure.

II. 20 pages of Being and Essence even Concept based on this pure Being.

A lot of stuff on pure being which is changed to essence, reflecting on life and perhaps capturing reflections, and Concept the conceptual object at all times – Althusser.

(Critique by Derrida – I prefer Kant as reflection, but I also believe it should be original, I call it conjuncture and reflection in the style of both Mind and Science of Logic – but nothing like the two, instead just a process of Kant in fact – just hand waving which develops a curation in fact)
